Product Description

DONGFENG chassis dry sanitation Driving Road Sweeper Truck

Product Detailed Specification:

Products Description:

Dry type road sweeper: the dry type road sweeper adopts the dry dust removal method, that is, the road sweeper does not spray water during the

dust removal process during the cleaning operation. Therefore, the dry type road sweeper must be equipped with a filter in the dustbin or air duct.

During the cleaning operation of the dry-type road sweeper, when the garbage with large specific gravity inhaled from the suction port enters the

dustbin, the sharp drop in the wind speed in the dustbin will cause natural settlement, while the inhaled fine dust with light specific gravity will be

intercepted by the filter when passing through the filter with the air flow. According to the different filter types of road sweepers, some dry-type

road sweepers can use water spray for dust suppression, while some dry-type road sweepers cannot use water spray for dust suppression to

prevent filter blockage.
